A Warning to Money Savers

Our one-third off-the-regular price sale will positively close on the 15th of this month. To date this sale has proven the greatest we ever inaugurated. It is true that many of our finest garments were sold at actually less than cost. We have the proud satisfaction of knowing that the public believes in our newspaper statements. It would be to our interest to stop our one-third-off sale now, as we were relieved of our enormous quantity of merchandise in the past ten days, but we said the sale will continue until the 15th of February, and we always do what we say we will. It will be your loss and not ours if you do not avail yourself of the opportunity to buy the best of Clothing for less money than you buy ordinary goods elsewhere.

"The best way to get rid of a bad law is to enforce it."—General Grant.

A FAVORITE expense for the improved condition of the farmers which the Free-silver advocates offer, now that they are compelled to admit an improved condition, is a statement that the improvement comes from the extraordinary demand for wheat, due entirely to the shortage of crops abroad. How do they account, however, for the fact that practically everything else produced by the farmer has advanced in the face of their assertion that nothing but an increase of the currency of the country through the free coining of silver, could bring an advance? Recent publications, compiled by the highest authorities, show that practically all of the articles produced by farmers have advanced materially since the declaration made by the Chicago Convention, and by Mr. Bryan and his followers in the campaign which followed, to the effect that only an increase of currency through free coining could advance prices. A table published by Bradstreet's, a generally accepted authority, shows this clearly, and is well worthy of reproduction for reference during the coming campaign, in which the Democratic leaders announce their determination of making the silver proposition again the leading issue of the contest.

Price of farm products January 1st, 1898, compared with July 1st, 1860:

It is also interesting to observe that while the price of articles produced by farmers have advanced in practically every case since July 1st, 1860, the prices of articles which they must buy have, in most cases, fallen, as will be seen by the following table obtained from the same source.

Prices of articles of farm consumption January 1st, 1898, compared with July 1st, 1898:

THE BUYERS' GUIDE.

SHOULD ALWAYS BE CONSULTED BEFORE MAKING A PURCHASE. My friend, this means \$25.00 to you. Remember that the war is over, for John J. Winter, the people's friend, is now in your midst and war-time prices are still of the past. The people are becoming acquainted with our business methods and are kindly pleased. To satisfy you of the fact, we do not charge you a cent for our services, and you can keep up your trade as long as you like, and you will never be disappointed. We make 10 per cent on everything that leaves our house. The Price Fighter has one price only, and if our employee of the time desires to deviate from this rule he will be dismissed at once. We want your business, but must have on our part one cent less than our competitor. We will save you money, for here you will get the best value for your money. That's our record in Bracken county, a witness for which the fact that our Bracken county friends have followed us here and bille of Furniture and Farm Implements daily leave our house for various shipping points in Bracken county, as the draymen, Wharfmaster and depot agents will testify to.

By their points they are known. We refer to our Plows, Wagons, Cultivators, Harrows, Corn Shellers and full line of Farm Implements. If there is a better implement made than the one you are now using surely you want to know it. Come, let us show you the points on our Farm Wagons and Implements and learn their true value. No trouble to show goods. Of course the price is right, for they are sold on the 10 per cent. plan, and the general rule elsewhere is 40 per cent.
